

THE GALAPAGOS ISLANDS

10 DAYS - STARTING QUITO 13th APRIL 2023

ECUADOR & THE GALAPAGOS

Trip Outline

Almost 1,000 km off the coast of Ecuador lies the world famous Galapagos Islands. Set on the equator these huge volcanic peaks, rising from the ocean floor, are home to many unique species of wildlife including the giant Galapagos tortoise. Charles Darwin's observations of the islands' flora and fauna played a substantial part in the formulation of his theory of evolution.

The month of April is a wonderful time to be in the Galapagos and it's a great time to be joining a small group wildlife cruise. The weather is warmer, the seas are calmer and underwater visibility is good. The daily rain showers are also shorter and many flowers are in bloom. The warmer weather of February, March and April sees many of the land birds, sea lions, turtles and tortoises that you'll find on the Galapagos breeding or nesting.

There is a real rhythm to your Galapagos cruise. The M.Y. Fragata takes a maximum of just 16 guests so you will never feel crowded out. Each evening your naturalist guide will brief you on the following days activities including which islands you will visit, what you can expect to see, whether the landing is a wet or dry landing, what to take and anything else you may need to know. Your activities normally involve a visit to one site in the morning followed by lunch on board and then moving to a nearby site in the afternoon. Much of the inter-island sailing will be done at night allowing you the maximum time to enjoy the amazing wildlife during the day.

Your trip starts in the Ecuadorian capital where you have a night to rest in preparation for your flight to the Galapagos the following morning. On arrival at the Baltra airport you will meet your naturalist guide who will transfer you to the 'Fragata' which will be anchored nearby. After meeting the boat's captain and crew your cruise will get underway. For the next week you will observe, swim and wander with some of the most amazing and friendliest wildlife on the planet. The wildlife coupled with the dramatic geology of the islands will leave you spellbound. At the end of your time in these remote islands you will reluctantly catch your flight back to Quito and to the end of your Galapagos adventure.

Your Cruise Boat – M.Y. Fragata

The dining room reflects the boat's friendly ambiance and meals are wholesome and delicious. Following lunch the boat visits Darwin Bay, home to colonies of frigates and a great variety of marine life. (BLD)

SUN 16 APR: BARTOLOME ISLAND-SANTIAGO ISLAND – Bartolome Island features distinctive lava formations and ash-cones, as well as a 375-step wooden stairs that takes you 114 metres above sea level to the top of the volcano where spectacular views of the bays below await you. The prominent "Pinnacle Rock" is located on this island and is one of the most visited sites in Galapagos. Following lunch you can enjoy an amazing snorkelling spot on Santiago Island where you can share the water with penguins and sea lions or relax on the lovely white sand beach. (BLD)

MON 17 APR: PLAZAS ISLAND-SANTA FE ISLAND – Plazas Island was formed out of lava and is now covered by the Opuntia cacti. Afterwards swim with sea lions in the lovely turquoise waters. (BLD)

TUE 18 APR: SAN CRISTOBAL ISLAND-WOLF ISLAND – Kicker Rock is a gigantic lava rock that sticks out of the Pacific Ocean's surface. The volcanic formation is split into two creating a surreal diving spot. The rock is frequented by an array of seafaring birds however the real attraction is the marine life: spotted eagle rays, sea turtles, white-tipped reef sharks, Galapagos sharks, and hammerhead sharks. The Witch's Hill on San Cristobal is home to blue and red footed boobies, rays and sea turtles. Following lunch you will visit Wolf Island (Lobos Island). There is no landing offered here but it is a great diving and snorkelling spot where the cold currents attract the rarer sea life. (BLD)

WED 19 APR: ESPANOLA ISLAND – A congregation place for the blue footed and masked boobies, Darwin finches, Galapagos doves, and from April to June the albatrosses make this part of Espanola their nesting grounds. Take the 3 kilometre trail and visit the colonies of sea lions and marine iguanas at the blowhole known as "El Soplador" (the blower) that sprays water 25 metres into the air. In the afternoon the boat moves to the east side of the island to Gardner Bay. This is the nesting ground for almost all of the world's 12 thousand pairs of Galapagos albatross. Gardner Islet offers a magical landscape both above and beneath the water surface. Many small fish can be seen while snorkelling around the site as well as sea urchins and starfish. (BLD)

THU 20 APR: FLOREANA ISLAND-SANTA CRUZ ISLAND – Floreana holds a large lagoon where flamingos come to feed. The green sanded beach owes its colour to the olivine crystals present in the soil and it is the perfect texture for the sea turtles to lay their eggs during their breeding season from December to May. The Devil's Crown is a wave-eroded volcanic crater surrounded by coral reef that creates an impressive underwater landscape where you'll be able to find schools of colourful fish, sharks and sea turtles.
